DOGS AND CATS ONLINE

South Australian
dog and cat breeder-seller's guide to microchip registration

! Dog and cat microchips must be recorded in Dogs and Cats Online. **When you sell an animal, you must transfer the record** to the owner. *This is quick, easy and free!*

Visit **dogandcatboard.com.au** for easy guides to Dogs and Cats Online or contact your local council.

Creating microchip records

When you have puppies or kittens microchipped, ask the implanter to create Dogs and Cats Online microchip records referencing your **DACO breeder number**.

If the implanter hasn't created a record, you can do this yourself. Just login to Dogs and Cats Online, choose **record microchip details** and upload a copy of the certificate provided by the implanter.

Even in council areas that don't charge cat registration fees (not all do) owners still need to register their cat with the microchip number you provide them.

Microchip records can be transferred to interstate addresses. Interstate owners might want to register their animal into a private national microchip database as well.

Before Dogs and Cats Online, microchip records were stored on privately-owned microchip registries. These services are still available as additional microchip recording options.

When you sell

You need to transfer the microchip record to the new owner. Here's how:

Go to **www.dogsandcatsonline.com.au**

1. Select **Register/Renew**
2. Select to **Register my new dog/cat**
3. Enter **Microchip number** and your **Surname**
4. Select **Transfer**
5. Enter owner's name, address and phone number
6. **Save**
7. Provide the **microchip number** to the new owner so they can register their new dog/cat

If you decide to keep a dog or cat, select **Register** instead of **Transfer** at step 4 above.
