

Part D: Public Access Test (to be completed by DCMB Approved Assessor)

Purpose of the Public Access Test (PAT)

The purpose of the Public Access Test (PAT) is to **assess if a dog is safe and effective in a public place or public passenger vehicle and able to be effectively controlled by the handler of the dog.**

The PAT indicates the minimum standard that a dog must achieve to be considered safe and effective in accessing public places and public passenger vehicles on a daily basis.

The PAT can only be conducted by an assessor approved by the Dog and Cat Management Board. A PAT conducted by a person other than a Board approved assessor is an invalid test.

Every element of the PAT must be passed to demonstrate that the dog and handler perform at the required standard.

Grounds for immediate failure of the PAT

The following are **grounds for immediate failure of the PAT** –

- A dog that displays any inappropriate aggressive behaviour (growling, biting, raising hackles, showing teeth etc).
- Any dog that urinates or defecates in a building or shows uncontrollable behaviour.
- Any dog that shows a display of guarding of people, territory, possessions or food.
- Any dog or handler who, due to their actions or behaviour is likely to bring disrepute ie a lack of respect or loss of good reputation to the dog, approved assessor or the Board.
- Any handler who ill-treats the dog or is not willing to abide by all relevant laws.
- A fail mark in any element of the PAT.

Scoring of the PAT

- A pass mark in all elements indicates that the dog displays appropriate behaviour.
- A fail mark in any element indicates that the dog displays inappropriate behaviour.
